SIMI Pre-Assessment

This survey was designed to help the organizer of the ROOT & SHOOT mentorship program understand your background, experience, and goals regarding culturally-aware mentorship practices. The survey is anonymous and we do not collect your email address.

At the end of the course, we will ask you to complete a post-assessment, which also will be anonymous and not in any way linked to you. The results of the both assessments will be used to gauge the impact of this course and to make any necessary adjustments to the curriculum.

Facilitators of the course will **not** have access to the information provided in these assessments until after the course is over, and then only in aggregate.

* Indicates required question

Culturally Aware Mentorship Self-Efficacy

These questions are meant to measure the degree of confidence that mentors exhibit within different cultural contexts. These items were developed based on the concept of self-efficacy, or the belief in one's ability to complete a given task.

Adapted from Measuring Research Mentors' Cultural Diversity Awareness for Race/Ethnicity in STEM: Validity Evidence for a New Scale. Angela Byars-Winston and Amanda R. Butz, CBE—Life Sciences Education 2021 20:2 Supplemental materials contain detailed information on validation and final measure.
